

Radon Report

Active Radon Test

180199
REPORT DATE: 1/3/2018

CLIENT INFO: Mary Homebuyer (603) 888-8888
mary.homebuyer@email.com

TESTING ADDRESS: 1001 Anywhere Dr.
Manchester, NH 03000

START DATE: 1/1/2018 TIME: 14:05
END DATE: 1/3/2018 TIME: 15:30
DEVICE LOCATION: Basement S/N: 4873

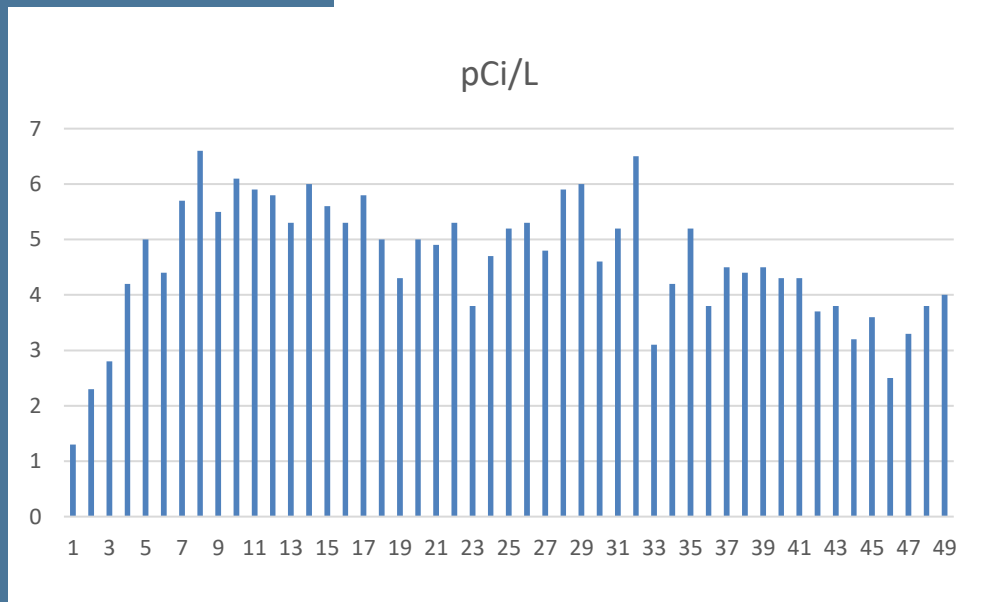

DEVICE CALIBRATION: 32331 DATE: 7/17/2017

PLACED BY:

The EPA recommends taking action to reduce Radon levels if the average is 4 pCi/L or greater. According to the EPA, the average Radon level in outdoor air is approximately 0.4 pCi/L, and the national average for indoor air is 1.3 pCi/L. For more information regarding Radon, please visit EPA's website at: www.epa.gov/iaq/radon/

TEST RESULTS

OVERALL AVERAGE: 4.7 pCi/L
MAXIMUM READING: 6.6 pCi/L
MINIMUM READING: 2.5 pCi/L

 Max: 6.6 pCi/L
 Min: 2.5 pCi/L

Thank You!

Quality Control: Each of our electronic continuous radon monitors are sent back to the manufacturer annually for factory recalibration. Calibration certificates are available upon request. 10% of our tests are conducted along with a secondary testing device (approximately every tenth test per device), to ensure continued accuracy between factory recalibrations.

Test Calibration: The first four hours of each test using electronic continuous radon monitors are considered a calibration period. These readings are recorded but not included in the overall average calculation, per EPA real estate radon testing protocol.
